SINGLE CYLINDER

GE725F - GE625F - GE525F

2 feeds single cylinder for men's socks machines are designed to increase productivity still ensuring best quality. They are available in different diameters with different numbers of needles. Automatic linking with the latest version of the SBYS device, performing a "real linking" technique. Advantages are remarkable: superior quality sock finishing, more comfort and resistance compared to socks made using conventional systems. New electronics provides control and execution of all machine commands. Drawings and articles are created and managed by Digraph 3 Plus software package, which contains a full collection of styles the operator can combine in different ways to obtain the desired results.

- 5 colors pattern on single feed course, plain knit or terry
- Reciprocated heel and toe in different sizes and 3D effects
- 28 yarn fingers
- Rising dial and finger plate with stepping motor
- 9 electronic actuators for needle selection
- Brushless coaxial main motor
