DOUBLE CYLINDER

E136HX - E146HX - E156HX

Double cylinder single-feed high speed machine for the production of men's, women's and children's socks in ribs, plain knit and links. Needle-needle single-magnet selection for different rib and links patterns. Tuck knitting option on lower cylinder. Brushless motor incorporated in the column with variable heel and toe reciprocating motion. 2 selection points instead of pickers and needle droppers. Electronic size control by automatic adjustment of the stitch. Available in 3" 1/2, 3" 3/4 and 4" diameters and gauge from 7 to 22. SbyS linking machine with different needle thickness according to machine gauge.

- Needle-needle single-magnet selection instead of pickers and needle droppers and links drums for different rib and links patterns.
- Simplified shell/skirt with less mobile cams used only in the closed toe procedure
- Takedown with electronic control and size self adjustment
- Stitch cams with independent stepper motors
- Easier sinkers maintenance thanks to the rotating knitting head
- Toe linking performed by SbyS linking machine
